C2 GROUP Holding

The C2 Group holding company is one of the largest enterprises on both Russian and CIS markets. The company manufactures and sells modern insulants and fillers made from both synthetic and natural fibers, as well as products made out of them.

The production potential of our company consists of three main fields: fabrication and sale of nonwoven materials, quilts and bedding. Areas of trading include wholesale of polyester staple fibers and a wide range of other fabrics.

The main strategic task of the C2 Group was, is, and will be building strong partnerships with our customers. Main priorities for the holding staff are speed and comfort of customer service and high quality of the products.

C2 Group constantly develops and introduces new materials and technologies in order to meet the customer demand. This approach has allowed us to build mutually beneficial relationships with more than 1500 partners from 40 regions of Russia and other CIS countries.

NONWOVEN FABRICS

The company has seven production lines, which include nonwoven materials made from artificial, polyester and natural fibers. C2 Group holding company offers a wide range of nonwoven fabric products - fillers and insulators, including the newest Slatex insulation and Miratek quilt insulation, that can be purchased directly from us. In terms of production volumes, the C2 nonwoven fabric factory is an undisputed leader between the Urals to the Far East. Because of our well-thought-out transport logistics and individual approach to customers, we maintain partnerships with companies throughout Russia and the near abroad.

SLATEX micro

Calendered insulation made from hollow highly twisted microfibers of various thicknesses. Can be used in any kind of clothes.

Width from 0,5 to 4,5 m **Density** from 80 to 300 g/m²

SLATEX pro

Calendered fire-resistant insulation. Capable of limiting flame propagation.

Width from 0,5 to 4,5 m **Density** from 80 to 300 g/m²

SLATEX premium

Soft, breathing insulation with hydrophobic properties. High thermal resistance coefficient. Used for everyday and sportswear.

Width from 0,5 to 4,5 m **Density** from 80 to 300 g/m²

MIRATEK

New generation quilted insulation, made out of highly twisted siliconized hollow fibers. Perfect for outerwear.

Width from 0,5 to 4,5 m **Density** from 60 to 400 g/m²

ALASKA

Non-woven materials from siliconized fibers with variable thickness and twistedness. Calendering is optional. Sewing and furniture production.

Width from 0,5 to 4,5 m **Density** from 80 to 600 g/m²

PADDING POLYESTER

Inflated nonwoven thermally bonded materials made out of synthetic (polyester) fibers. Calendering is optional. Wide range of applications.

Width from 0,5 to 4,5 m **Density** from 60 to 700 g/m²

VISCOSE CLOTH

Materials that contain natural components: bamboo, eucalyptus, or seaweed fibers. Ideal for bedding.

Width from 0,5 to 4,5 m **Density** from 80 to 500 g/m²

WOOL/POLYESTER mix

Nonwoven materials that include natural wool (sheep, goat, camel, etc.) and hollow polyester fibers. Used in sewing production.

Width from 0,5 to 4,5 m **Density** from 60 to 700 g/m²

SUPERPUCH filler

Eco-friendly filler that consists of combed siliconized polyester fibers. Comes in a form of combs or balls. Wide range of applications.

Fiber thickness: from 2 to 7 den **Cutting length** 32, 64 mm

POLYESTER FIBERS

Polyester fibers are polyethylene terephthalate synthetic fibers that are widely used in the textile industry. Long-term contracts and well-established supply logistics, cooperation with Russian and foreign manufacturers enable us to trade a wide range of staple polyester fibers with various technical parameters and compositions. The perfect quality of our siliconized fiber that we maintained for many years is highly appreciated by our partners. C2 Group Holding Company also imports and sells bamboo and viscose fibers.

SR

Regular continuous polyester fiber.

Thickness
from 6 to 20 D

Cutting length
51, 64 mm

SR micro

Regular continuous polyester microfiber.

Thickness
from 0,7 to 3 D

Cutting length
51, 64 mm

SRS micro

Regular siliconized continuous polyester microfiber. A good alternative for duck fluff.

Thickness
from 0,7 to 3 D

Cutting length
51, 64 mm

HC

Highly twisted hollow polyester fiber

Thickness
from 6 to 15 D

Cutting length
32, 64 mm

HCS

Highly twisted hollow siliconized polyester fiber.

Thickness
from 6 to 15 D

Cutting length
32, 64 mm

HCS micro

Highly twisted hollow siliconized polyester microfiber.

Thickness
from 1 to 4 D

Cutting length
32, 64 mm

LM

Low melting bonded fiber (bicomponent).

Thickness
from 2 to 4D

Cutting length
51 mm

Bamboo

Bamboo cellulose artificial fiber.

Thickness
3 to 5 D

Cutting length
32, 64 mm

Viscose

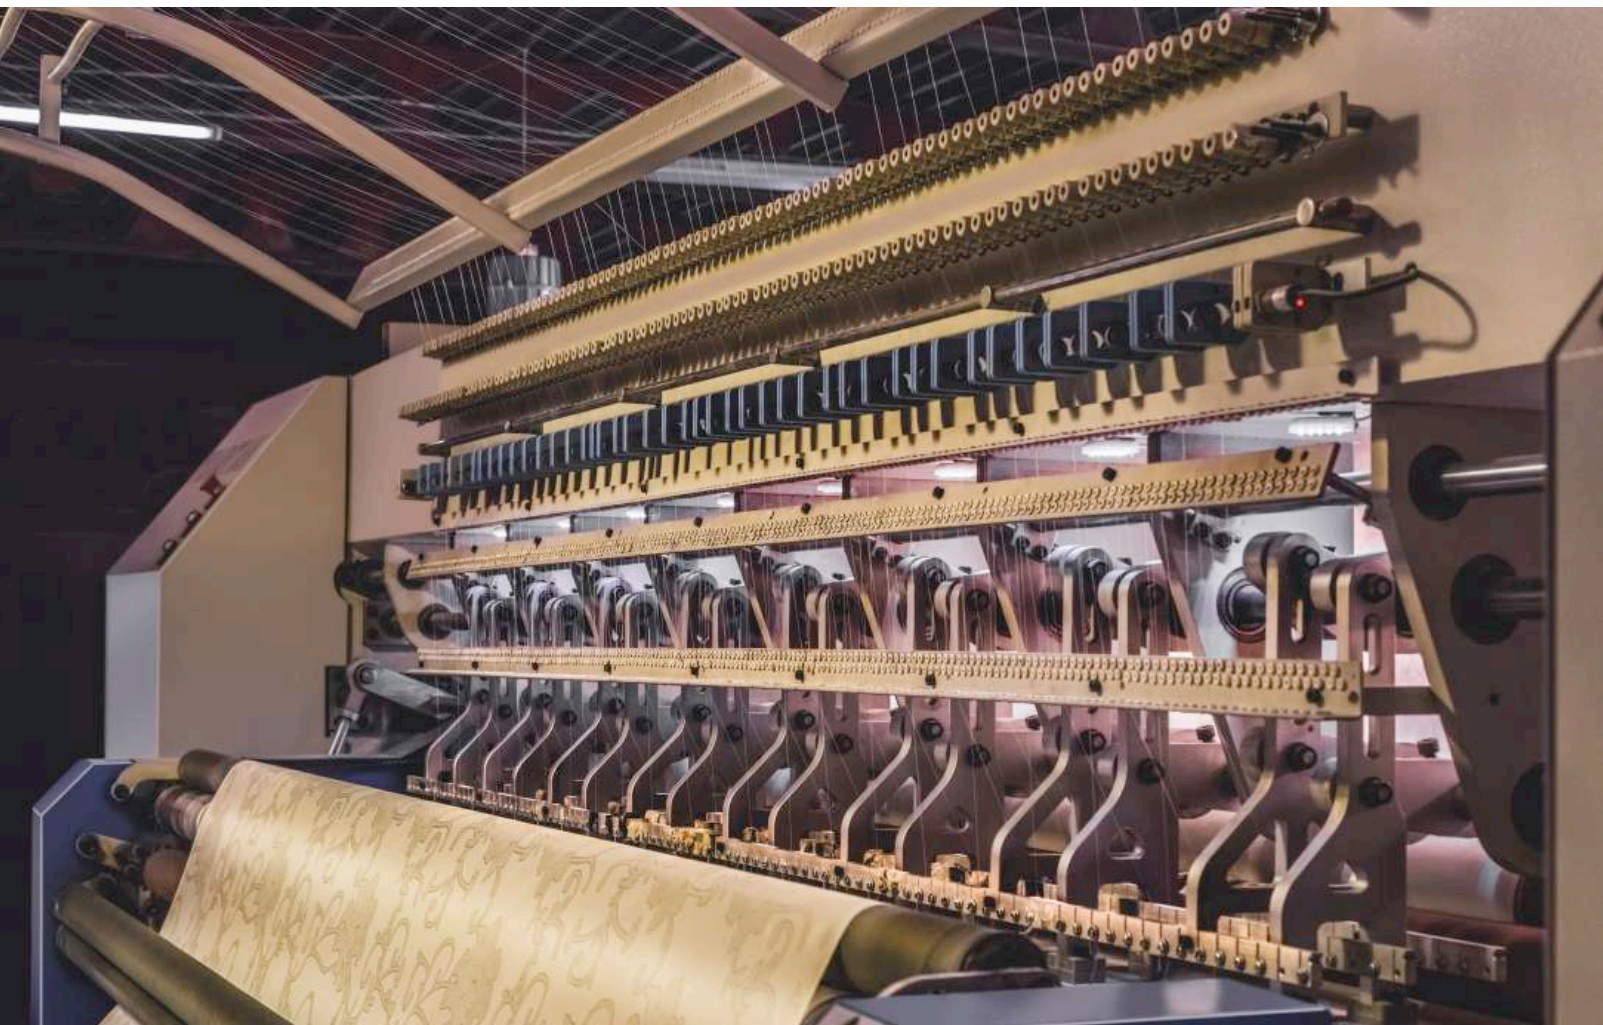

Viscose cellulose artificial fiber.

Thickness
from 3 to 5D

Cutting length
32, 64 mm

QUILTS

The C2 Group factories are equipped with topnotch quilting equipment: ultrasonic, chain, thread and shuttle computer aided machines. Various patterns can be stitched onto any insulant of own manufacture. A wide range of fabrics in our warehouse allows us to fulfill any orders. Be it mattresses, bedding, insulation, or everyday clothes - we will complete your order in the shortest time possible without any compromise for quality. For your convenience we also accept customer's own materials. Our new generation of insulation "Miratek" - a cloth made of twisted hollow siliconized fibers, quilted on both sides with spunbond, is in a very high demand among our clients that specialize in uniform manufacturing.

For mattresses

Insulation: padding polyester and foam rubber/wadding.
Material: jacquard + spunbond, jacquard cotton, tricot, double tricot, polycotton.

Width 212, 220, 240 cm **Density of insulation** From 70 to 400 g/m²

For upholstered furniture

Insulation: padding polyester and spunbond.
Material: lining fabric, polyester, polycotton.

Width 150, 220 cm **Density of insulation** From 70 to 400 g/m²

For bedding

Insulation: padding polyester, Alaska, bamboo fabric, wool/polyester mix.
Material: coarse calico, polycotton, polyester, microfiber, jacquard, tricot.

Width 150, 220 cm **Density of insulation** From 80 to 300 g/m²

For uniforms

Heater: Miratek Standard, Miratek Arctic, Miratek Premium, Miratek Arctic, Super, padding polyester, Alaska.
Material: fabric lining.

Width from 100 to 230 cm **Density of insulation** from 80 to 300 g/m²

For bed covers, mattress covers

Insulation: padding polyester, Alaska, viscose fabric, wool/polyester mix.
Material: polycotton, polyester, microfiber, polysatin, jacquard.

Width 220 cm **Density of insulation** from 80 to 300 g/m²

For funeral clothing

Insulation: padding polyester.
Material: lining fabric, satin.

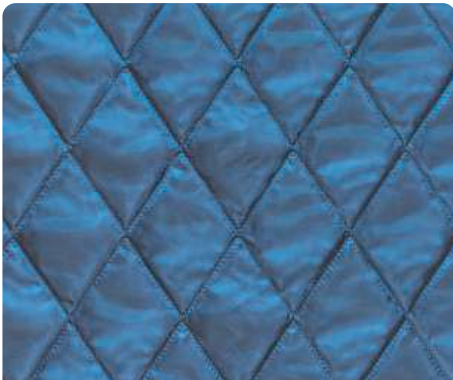

Width 150, 220 cm **Density of insulation** from 60 to 100 g/m²

For infant products

Insulation: padding polyester, spunbond.
Material: coarse calico, polycotton, satin.

Width 150, 220 cm **Density of insulation** from 60 to 300 g/m²

For insulated products

Insulation: padding polyester, Alaska, Miratek.
Material: fabric lining.

Width 150 cm **Density of insulation** from 60 to 400 g/m²

For headwear

Insulation: padding polyester.
Material: fabric lining.

Width 150 cm **Density of insulation** from 60 to 300 g/m²

HOME TEXTILES

C2 Group holding's own 12 years old high-tech garment production line manufactures mattress covers, pillows cases, bed linens, blankets and bedspreads. It features modern top-notch special equipment that allows us to produce high quality products in any quantities or price categories. Our range of products includes more than 400 items. More information about our products can be found on Edengood.ru

Feather/fluff products

Breathing and highly hygroscopic, the product is both soft and elastic.

Filler: Water birds' fluff and feathers
Fabric: teak

Sheep's wool products

Highly hygienic, removes static stress and is ideal for sleep.

Filler: Mixture of sheep's wool with polyester
Fabric: Teak, polycotton

Camel's wool products

Natural and hypoallergenic, protects both from hypothermia and from overheating.

Filler: Mixture of camel's wool with polyester
Fabric: Teak, polycotton

Plant fibers products

Hypoallergenic, antibacterial and ecological. Regulates temperature.

Filler: Mixture of bamboo and eucalyptus fibers with
Fabric: Teak, polycotton, polyester

Polyester fibers products

Ideal for sleep and rest, hypoallergenic filler.

Filler: 100% polyester
Fabric: Polycotton, chintz, coarse calico, polyester

Cotton wool products

Practical and durable, the products combine softness and functionality.

Filler: Cotton wool
Fabric: Teak, polycotton, polyester

Bedspreads and mattress covers

Durable and variable in design, the products guarantee hygiene of the mattress.

Filler: Sheep's wool, polyester
Fabric: Teak, polycotton, polyester, knitwear

Bedding sets

Sizes: Sheet Comforter Pillow case
Twin 150x214cm/60x84"
143x215cm/56x84"
70x70cm/27x27" or
50x70cm/20x27"

Fabric: Polycotton, poplin, coarse calico, satin

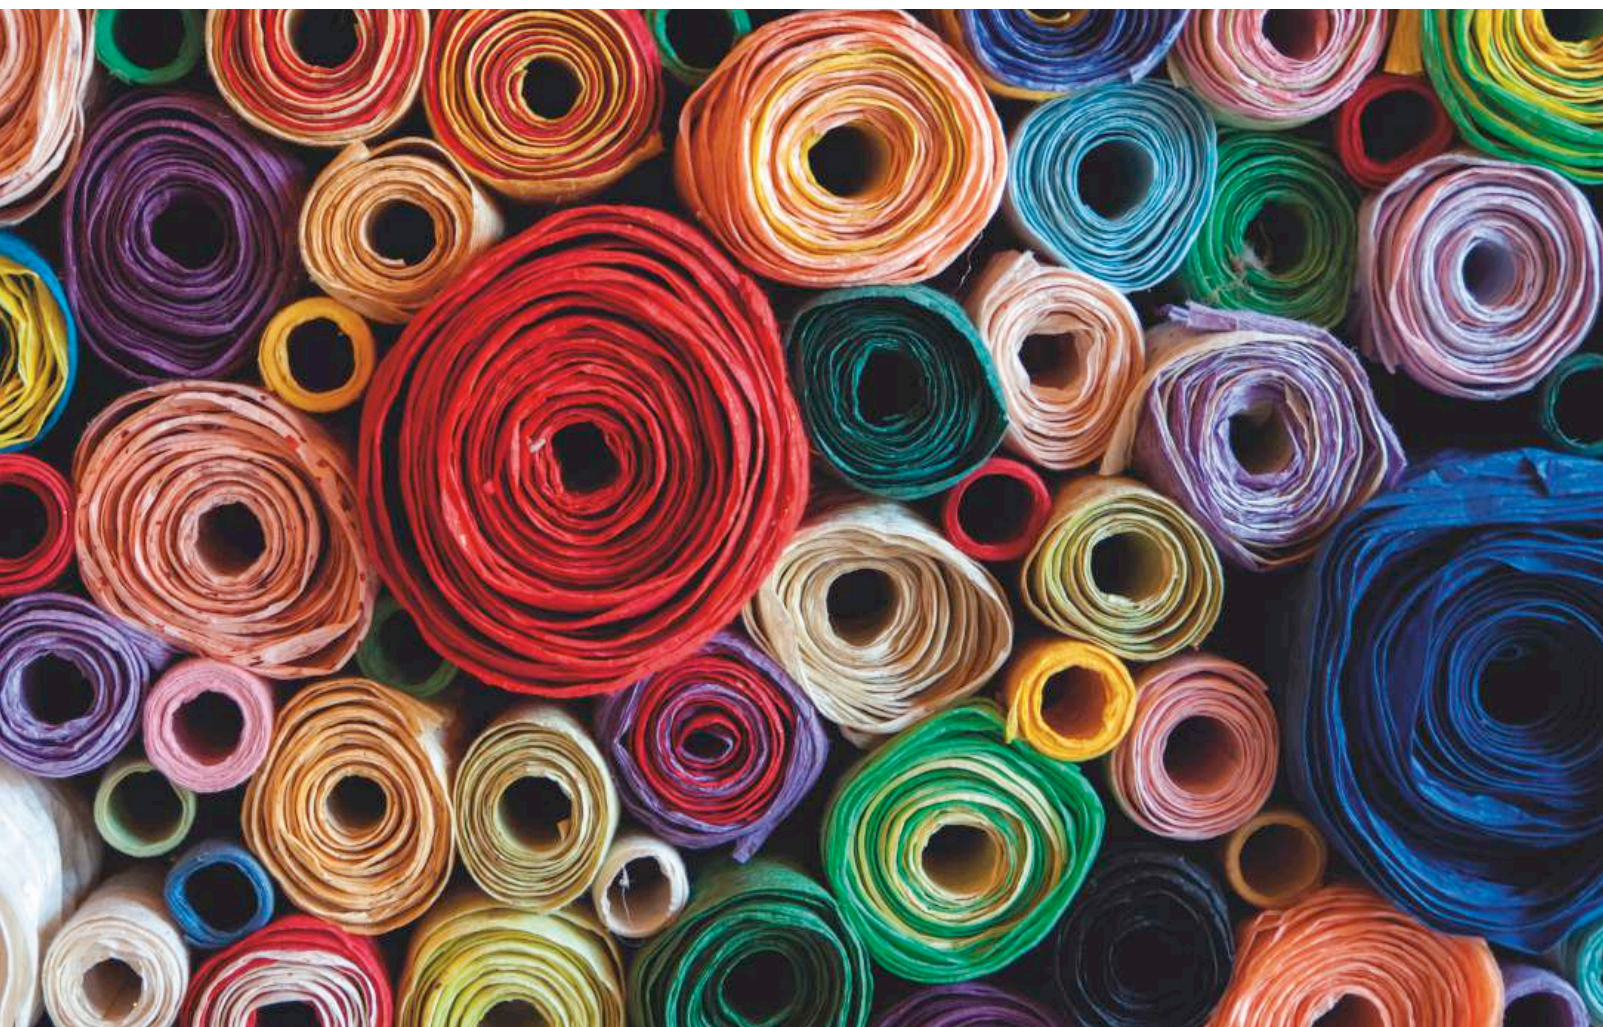

Terrycloth

Assortment: towels, sheets, napkins, bathrobes, bath accessories, foot mats.

High strength - double twisted thread; available in 24 shades; Material: 100% cotton.

FABRICS

C2 Group Holding company has developed and expanded in the fabrics wholesale direction for the last 10 years. We manufacture and distribute cotton, mixed and synthetic fibrous compounds licensed from domestic and foreign leaders of textile production. Partnerships with multiple factories in China, Uzbekistan, Pakistan and other countries enable us to provide our clients with optimal prices, attractive design and the consistently high quality of our goods. Our assortment includes more than 50 types of different fabrics and 1000+ variations with unique designs and colors.

Polycotton

Monochrome base with a pattern, print or a premade design.
Composition: cotton and polyester.
Manufactured in Pakistan.

Width
220 cm

Density
100, 120 g/m²

Monochrome polyester

Monochrome base with a pattern or a premade design.
Composition: 100% polyester.
Manufactured in China.

Width
220 cm

Density
60, 70 g/m²

Printed polyester

With a print or premade 3D pattern.
Composition: 100% polyester.
Manufactured in China.

Width
220 cm

Density
60, 65-70 g/m²

Microfiber

With embossing, silver, or a printed 3D pattern.
Composition: 100% polyester.
Manufactured in China.

Width
220 cm

Density
85 g/m²

Mattress jacquard

Cotton - composed of cotton and polyester; spunbond, tricot, double knitwear - 100% polyester.
Manufactured in China.

Width
220 cm

Density
90, 120, 180, 240 g/m²

Calico

With a premade design (bedding, children bedding, etc.)
Composition: 100% cotton.
Manufactured in Russia, Uzbekistan.

Width
150, 220 cm

Density
55 g/m²

Teak

Base with bird fluff mix.
Composition: cotton and polyester.
Manufactured in China.

Width
220 cm

Density
140 g/m²

Flannel for infants

Premade prints for children .
Composition: 100% cotton.
Manufactured in Uzbekistan.

Width
100 cm

Density
170 g/m²

Taffeta lining fabric

Monochrome lining fabric - T190.
Composition: 100% polyester.
Manufactured in China.

Fiber thickness:
150 cm

Cutting length
55 g/m²

WHY C2 GROUP?

Individual approach to every customer

Focus on customers and long-term partnerships

Developed logistics

Dedicated car park and a convenient location

Speed and efficiency

Quick order processing starting from one day

High quality

Quality of our products is confirmed by multiple certificates and tests

Team of professionals

More than 250 qualified experts and specialists

Modern technologies

New high-tech imported equipment

A wide assortment of products

Innovative warehouse accounting techniques

Reliable partnership

Stability of supplying and purchases all year round

Russian industrial and trading holding of international level C2GROUP
